PROFESSIONAL SUMMARY

Recent BCA graduate with practical, hands-on experience in IT support and infrastructure, gained through a Desktop Engineer internship at Service 2 IT Services. Proficient in operating system installation, hardware diagnostics, network troubleshooting, and delivering responsive end-user technical support. Complemented by project experience in IoT systems integration and cloud-based solutions. Eager to contribute to a Service Desk, Remote Support, Network Support, or Cyber Security role, bringing a strong technical foundation and a fast, adaptive learning mindset.

INTERNSHIP EXPERIENCE

Desktop Engineer Intern — Service 2 IT Services | *IT Support / Infrastructure* | Jan 2026 – Feb 2026 (2 Months)

- Installed and configured operating systems (Windows/Linux) on desktop and laptop systems for end users.
- Performed hardware troubleshooting and maintenance including diagnosis of faulty components.
- Handled software installation, updates, and patch management across multiple machines.
- Resolved network connectivity issues by diagnosing LAN/Wi-Fi faults and reconfiguring network settings.
- Provided end-user technical support and resolved day-to-day IT queries efficiently.
- Maintained system logs and documentation for all service requests and resolutions.
- Assisted in IT infrastructure management tasks under the supervision of senior engineers.

TECHNICAL SKILLS

Programming Languages: C, C++, Python, Java

Networking: TCP/IP, IP Addressing & Subnetting, DNS, DHCP, Network Troubleshooting (Ping, Traceroute, Ipconfig), Basic Router & Switch Configuration

Cyber Security: Kali Linux, Wireshark, Nmap, Basic Cyber Security Concepts

Databases: SQL, PHP

Tools & Platforms: VS Code, NetBeans, Python IDLE, MS Excel, MS PowerPoint, MS Word

Operating Systems: Windows (System & Network Troubleshooting), Linux (CLI, File Management, Networking Commands)

PROJECTS

Smart RFID-Based Attendance Monitoring System (Final Year Project)

Tech: Arduino (C/C++), JavaScript, ESP8266, RFID (MFRC522), Google Sheets

- Built IoT-based attendance system using RFID cards with real-time cloud sync to Google Sheets via ESP8266 WiFi.
- Developed Arduino firmware for RFID data capture and Google Apps Script for automated cloud storage.
- Performed end-to-end testing, debugging, and optimization ensuring reliable performance.

EDUCATION

Bachelor of Computer Applications (BCA) — Tilak Maharashtra Vidyapeeth, Pune | 2023–2026

Higher Secondary Certificate (HSC) — Maharashtra State Board | 2023

Secondary School Certificate (SSC) — Maharashtra State Board | 2020

CERTIFICATIONS

- AI and Life & Employability Skills Orientation — Magic Bus India Foundation (Infosys Foundation)
- Cyber Security Training — ExcelR EdTech Pvt. Ltd.

CORE COMPETENCIES

Team Collaboration • Quick Learner & Adaptive • Computer Fundamentals • Problem-Solving • Communication Skills

LANGUAGES

Hindi (Native) • Marathi • English
